Our mission is to enrich the lives of our citizens by offering quality active and passive recreational opportunities and accessible youth and adult services while pursuing the preservation and enhancement of our natural, cultural and historic resources.

Enjoy the natural beauty of Anne Arundel County by visiting a regional park or community park. What better way is there to spend pleasant days than with friends and family, enjoying one of the many wonderful parks and trails. Pavilions can be rented in the parks for large outdoor parties and cook-outs. These covered pavilions are equipped with grills and picnic tables.

Walking Tips

Dress in Layers – The weather and even your own body temperature can fluctuate as you walk or hike. Layering allows you to comfortably add or remove clothing as needed during your activity.

Stay Hydrated – If you plan to be active for an hour or less, plain water is typically the best option to keep you hydrated. If your activity will last for more than 1 hour (or the outside temperature is high) a sports drink, juice or milk provide important nutrients and electrolytes to prevent dehydration.

Pack a Snack – Keeping a healthy snack on hand is a good idea just in case your walk goes a little longer than planned. Snacks that travel well include an apple, banana, granola bar or a small snack bag filled with nuts, trail mix or pretzels.

Wear Sunscreen – Anytime you are out in the sun no matter what time of year it is, it is important to protect your skin by wearing sunscreen.

Bring a Buddy – Having someone to walk with makes the journey safer and more enjoyable.

Good luck on your journey to better health!

B&A Railroad Electrical Substation

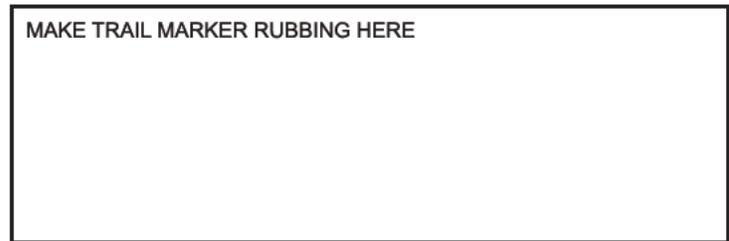

B&A 4

Location: B&A Railroad electrical substation

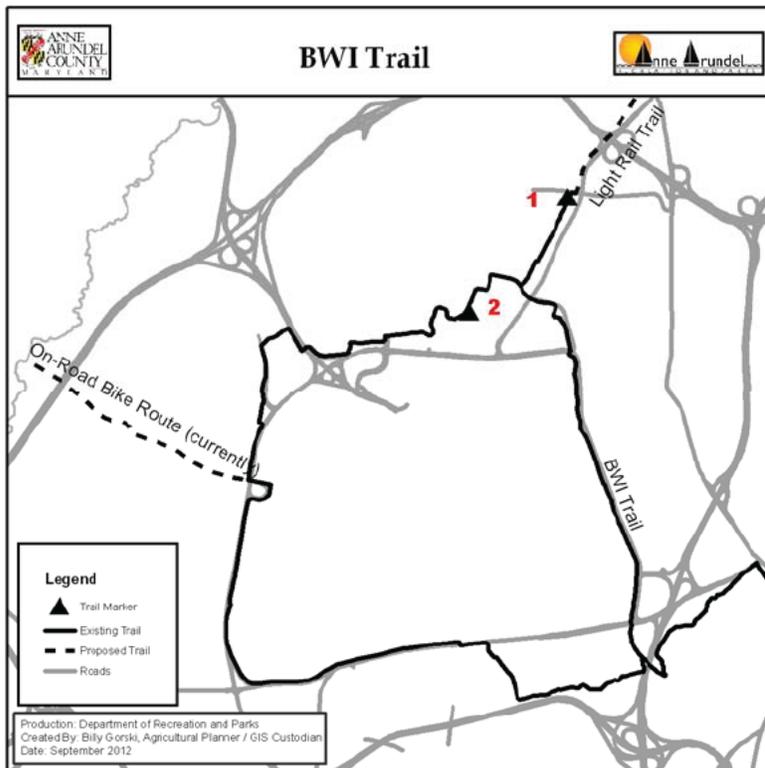

Difficulty: Easy

Length: .1 mile north of Jones Station Road, Severna Park

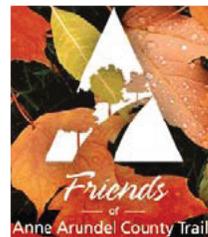

Features: The B&A Railroad, in order to meet developing competition from the WB&A Railroad, switched from steam locomotives to self-propelled electric interurban cars in 1908. Initially 6600 volt alternating current powered its trains. In 1913, this substation was built when the railroad converted to 1200 volt direct current for propulsion.
